SUMMARY

Recent Computer Science graduate with hands-on experience in backend development and database management for full-stack web applications. Proficient in designing APIs, implementing server-side business logic, and working with relational databases to ensure efficient data handling. Eager to contribute to real-world backend systems and grow through collaboration in a dynamic development team.

EDUCATION

Bachelor of Science in Computer Science , Savitribai Phule Pune University	2022 - 2025
BSC (CS) CGPA : 7.92	
Higher Secondary Education , Maharashtra State Government - 44.17%	2020 - 2022
Secondary Education , Maharashtra State Government - 70.80%	2020

EXPERIENCE

Internship - API Developer , (Probus Software Pvt Ltd)	August 2025 - December 2025
Integrated the application with a database using stored procedures for efficient data handling.	
Developed and optimized SQL procedures to perform insert, update, and retrieval operations.	
Improved backend performance, maintainability, and data security through structured database integration.	

UNIVERSITY PROJECTS

1. Online Voting System

Implemented a secure registration process managed by an administrator, ensuring voter authenticity. Utilized PHP for server-side logic, MySQL for data storage, and HTML/CSS for frontend development. The system supports functionalities such as voter registration, login, and vote casting, with results processed and displayed promptly

2. Automatic Timetable Generator

Developed an automatic timetable generator using Spring Boot, Hibernate, and MySQL, cutting manual scheduling time by 40%. Designed logic to allocate slots based on key academic relationships and enabled customizable daily slot configurations, improving accuracy by 10%. Optimized algorithms to reduce scheduling conflicts by 25% and ensure fair resource distribution.

3. Surveillance Car using ESP-32 Camera Module

Reduced latency in real-time video processing by 50% through backend implementation in Embedded C. Designed a user-friendly frontend interface using HTML & JS, enhancing interaction with live video feeds by 60%. Integrated the ESP-32 Camera Module to enable reliable video streaming for remote surveillance applications.

SKILLS

Technical Knowledge	Languages : C#, Java, SQL, MySQL, MSSQL, Python Frameworks : Spring Boot, Spring MVC, Hibernate, Entity Framework, Dapper Framework Tools : Git, GitHub, VS Code, Eclipse, Postman Libraries : Nodejs
Soft Skills	Strategic Planning and Execution Eager to embrace emerging technologies Strong focus on precision and efficiency

CERTIFICATIONS AND TRAINING

1. Full Stack Java Development , Symbiosis Centre for Distance Learning	July 2024
2. Data Structure Using C Programming , Swayam	June 2024
